-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3,5,6,8-10,17-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Berrang et al (6358281).

See fig. 2, which shows housings 2 and 3 which are partially covered in an overmold, and fig. 1 which shows another housing 1 which included^s a coil for recharging the battery in housing 2. Also, housing 3 contains circuitry for operation of the implant.

Claim Rejections - 35 USC § 103

3. Claims 2,4,7,11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berrang et al.

To make the housing cylindrical is considered to be an obvious design choice.

The skilled artisan would be expected to shape the device to a shape that is most comfortable for the patient. Further, re claim 4, to use a housing is considered to have been obvious in that such would serve to protect the coil from damage. To put the battery in housing 2, as opposed to housing 3, as shown in fig. 2 of Berrang, is considered to be a design choice.

4. Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berrang et al in view of Faltys et al (6308101).

To encircle the first module with a recharge coil, as shown in figures 4a and 4b of Faltys, would have been obvious in order to save space, and make the device more compact. Also, re claim 15, figure 6 shows a tether 222. To connect the modules using a tether would allow for more flexibility in the arrangement of the modules.

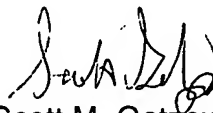

Since new rejections have been made, this action is not made final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.
